TI - OINTMENT FOR HEMORRHOID

AB - PURPOSE: To provide an ointment for hemorrhoid, giving improved drug action to the diseased part of hemorrhoid, and effective to remarkably mitigate the symptom of hemorrhoid, by adding a compound selected from PVA, pectin, MC, PVP, pullulan and tragacanth rubber to a conventional ointment base.

- CONSTITUTION: One or more compounds selected from PVA, pectin, MC, PVP, pullulan and tragacanth rubber are added to a conventional ointment base (e.g. oil or fat, wax, hydrocarbon, etc.) to obtain the objective ointment for hemorrhoid. The drug added to the ointment is e.g. anti-inflammatory agent (e.g. cortisone, dexamethasone, etc.), an incarnant [e.g. allantoin, SHIKON (root of Lithospermum erythrorhizon), etc.], and a local anesthetic (e.g. lidocaine, etc.). The action of the drug to the diseased part of hemorrhoid can be improved and the symptom of hemorrhoid can be remarkably mitigated by this ointment.
